SUMMARY

Full-Stack Software Engineer and Machine Learning Practitioner — GATE 2025 AIR 4358 (Data Science & AI). Built production systems serving real clients on AWS; engineered ML models at 94–96% accuracy. Graduating B.Tech (Computer Science) from AKTU in 2026.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University

Lucknow, India

B.Tech in Computer Science — Aggregate: 74.53% (through 7th semester)

2022 – 2026

P.M.S. Public School (CBSE)

Class 10: 79.4% • Class 12: 82.8%

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), C, C++, SQL

Core Fundamentals: DSA, Computer Networks, Operating Systems, DBMS

Web & Servers: React.js, Node.js, Express.js, Flask, Nginx, REST APIs, Tailwind CSS, HTML5, CSS3

ML & AI: RAG, Scikit-learn, Keras, TensorFlow, CNN, ANN, Random Forest, XGBoost, SVM

Data Science: NumPy, Pandas, Matplotlib, Seaborn, Statistical Modeling, Feature Engineering, Power BI

Cloud & Databases: AWS (EC2, Lambda, S3, IAM), GCP, MongoDB, MySQL, Firebase, MS SQL Server

DevOps & Tools: CI/CD Pipelines, Docker, Git, Postman, Webpack, Jest, Vercel, Jupyter Notebook

EXPERIENCE

Software Development Engineer Intern

2025 – 2026

GoZoom Technologies

Remote

- Migrated client-side logic to the backend and optimised MongoDB aggregation with pagination, achieving a **30–40%** improvement in system performance.
- Delivered 5+ end-to-end full-stack web and mobile applications for international clients, independently managing requirements gathering, development with React.js and Node.js, and AWS deployment.

PROJECTS

CODE++ | React, Node.js, MongoDB, Judge0 API, Socket.io

Mar 2026

- Competitive DSA platform with a **multilingual code execution engine**; built 1v1 competition mode and real-time leaderboards via WebSockets.
- Optimised analytics dashboards tracking performance metrics across 500+ LeetCode-style problems; actively used by college peers.

Safely Hands [Live] | MERN Stack, AWS EC2, Nginx, Certbot

Feb 2026

- Architected a **service-aggregator platform** for domestic care; engineered dynamic service catalogs and automated lead-capture pipelines.
- Managed production deployment on AWS with SSL encryption, ensuring high availability for real-time service booking.

Crop Wizard | Python, Flask, Scikit-learn, React, MongoDB

Dec 2025

- Integrated a **ML microservice** into a MERN app for real-time crop predictions via REST API.
- Ensemble classifier (Random Forest, XGBoost) reaching **96% accuracy**; optimised pickle size for cloud deployment.

RADMIC | Python, TensorFlow, Keras, CNN, Scipy

Sep 2024

- Dual-stream CNN classifying drones vs. birds from **radar micro-Doppler spectrograms**; achieved **94%+** validation accuracy.
- Custom data generators for real-time stream processing; model exported in HDF5 for low-latency inference.

ACHIEVEMENTS

- **GATE 2025 – AIR 4358** (Data Science & AI)
- **TCS NQT IT 2026:** 85.62% Overall (94% Coding)
- **Turbo AI Challenge AKTU, (2024):** Zonal Winner & State-level Finalist
- **500+** LeetCode Challenges Solved
- **Softpro Internship (2025):** A+ Grade (Python/DS)
- **MIT Tech Club:** Student Coordinator & Mentor

CERTIFICATIONS

- NPTEL – Data Science for Engineers (2025)
- NPTEL – DSA with Python (2024)
- NPTEL – Introduction to IoT & IIoT 4.0 (2024)
- NPTEL – Python for DS (2024)
- PCAP – Python Certified Associate (2023)
- CISCO – Introduction to Cybersecurity (2022)
